

DPW Building Committee

November 3, 2015 - 6:30 PM – Senior Center Town Hall

Present: Jim Bender, Kyle Johnson, Ron Putnam, Brian Pochini, Steve Nims

Absent: Kelley Hansen, Jamie Piedrafite

The meeting was called to order by Selectman Kyle Johnson, at 6:40 PM

The purpose of meeting was to discuss Weston & Sampson updates and plans for the upcoming open house tour the DPW facility.

The minutes from the 13 October 2015 DPW Building Committee were read and accepted.

Jeff Alberti, Weston & Sampson architect, was not able to make tonight's meeting. He will be asked to review and revise the drawings in the 2009 proposal and discuss them at the next meeting. This should include items like scaled numbers, opportunities for cost savings, and cold storage facilities.

The size and materials for the salt shed were discussed. A "bubble shape" type that is made from fabric material on a concrete wall would be more cost effective and last longer than a metal or wooden type shed.

Plans for the first public, open house tour of DPW facility on 14 November were discussed focusing on publicity efforts as well as what information to present during the tour.

Notices for the event will be placed in the papers, Facebook and on the Town Web Site.

Information during the tour will be presented in an "Info Graphic" format that Weston & Sampson has built. The information is in basic, simple, easy to grasp bullets. One critical piece of information for future presentations will be the impact for the new DPW facility to the tax bills.

The next DPW meeting is scheduled for November 18th, 2015 at 6:30 PM in the lower level meeting hall at the Town Hall.

Respectfully Submitted,

Ron Putnam

Secretary DPW Building Committee
